Foti Masonry Recommendation Letter

To Whom It May Concern:

On behalf of Skanska USA Building, we are honored to have this opportunity to provide an extremely favorable recommendation of Foti Masonry. Foti Masonry was awarded our \$1.5M masonry subcontract on the Carilion Clinic Project in Roanoke Virginia. Their work included interior CMU walls, exterior brick veneer, architectural block and mason set precast. Without question their overall performance was flawless. Skanska USA Building has exceptionally high standards for both quality and safety and Foti Masonry not only withstood our highest scrutiny but did so willingly as our partner. It was Foti's performance on the Carilion Clinic Project that provided us the confidence to award them even more complex projects on the campus of Virginia Tech University and solicit their involvement in our upcoming projects in North Carolina.

It is without reservation but the highest regard that I offer my recommendation of Foti Masonry. Should I be needed for further validation of their performance, please feel free to contact me directly at 919.941.7937.

Sincerely,
SKANSKA USA BUILDING INC.
