Hi John,

I wanted to let you know that we think Todd did a fantastic job running the field work at Gilmour. He was incredibly knowledgeable, raised potential issues ahead of time without just installing what the drawings showed, and cared about delivering a top quality product to the owner. I would be thrilled to have him as the leader on future projects.

It was said numerous times by the architect that we really pulled together the "A" team on this one. I find that statement to be true and do not think the project would have been as successful without Foti on board. I know it was not an easy road and want to thank you for all of the effort put in from both the field and office.

Thanks,
Ashley
